

### Benefits 优点和独特之处

- Up to 97% of brine water recovered for drinking  
可从海水淡化浓缩液中提炼出 97%的饮用水
- Up to 100% of other minerals recovered for use or sale  
100%的矿物质可被提炼出来再利用或是销售
- Prevents any environmental impact from desalination plant  
避免传统海水淡化对环境的不利影响

### New Australian Technology 全新澳洲科技

- Uses first principles of physics in a new distillation process  
将物理原理运用到新的蒸馏过程中
- Energy is recycled in a low-temperature, ambient pressure, accelerated evaporation process like a natural weather system  
能量在低温，环绕压力和加速蒸发的过程中得到循环使用，类似于天气系统
- Perfect conditions for evaporation and for rain are created inside the appliance making a distillation process more effective but less expensive than alternatives  
设备内部设计给蒸发和制造雨创造了绝好的环境，这样可使整个蒸发过程更加有效而低成本地运行

Test in Australia successfully  
在澳洲样品测试成功

**Green technology to recycle, recover & reuse**  
绿色环保技术可用来回收和再利用资源

**4/12/20kL per day per appliance**  
设备为每天 4/12/20 吨

**Modular Appliances**  
模型设计

**Up to 97% clean water recovery**  
可提炼 97%的清水

**Up to 100% contaminant extraction & recovery**  
可提炼 100%的矿物质

**Zero Liquid Discharge (ZLD)**  
零排放

**Absorbs Waste Heat**  
吸收废热

**Low Temperature Distillation**  
低温蒸发

**No Membranes Required**  
无需用膜

**No Pressure Vessels**  
无需用压力管

**Remote Support Option**  
可选遥控技术支持
